Discover Your Family Story With Family Tree Maker!

FTM 2019 for Mac and Windows

For thirty years Family Tree Maker® has been America's favorite genealogy software making it easier than ever to discover your family story, preserve your legacy and share your unique heritage. If you're new to family history, you'll appreciate how this intuitive program lets you easily grow your family tree with simple navigation, tree-building tools, and integrated Web searching. If you're already an expert, you can dive into the more advanced features, options for managing data, and a wide variety of charts and reports. The end result is a family history that you and your family will treasure for years to come!

Family Tree Maker TOP FEATURES

Rich Color Coding

One of the most frequent requests from genealogists using FTM 2017's color coding, was for "rich" color coding - not just coding the home person's ancestors but each ancestor's descendants as well.

Charts & Reports

View and share your discoveries with a variety of colorful family tree charts, such as pedigree, descendant, boattie and fan charts, and create reports that provide a snapshot of your family tree and help you plan what to research next. More options and views let you display an individual's ancestors, spouses, and children together. Also, the Index of Individuals Report has been expanded with options for anniversary, birthday, contact lists, and more.

View charts and reports and share with family and friends.

Photo Darkroom®

Elegantly simple editing tools.

Powerful but easy-to-use tools that in just a few clicks can take an old photo faded beyond recognition and restore it to look like the day it was printed.

Organize media with ease

Illustrate your family story with photos, historical records, and audio and video files. The easy-to-use tools in Family Tree Maker help you manage media faster than ever before, as well as add photos directly from iPhoto®, scan images directly into your tree, and even create slideshows.

Store photos and more right inside Family Tree Maker.

Put your ancestors on the map

Access interactive street and satellite maps to view important locations in your ancestors' lives and track your family's migration paths.

Trace your ancestors' footsteps.

Companion Guide

This guide offers you a step-by-step tour of the program and all that you can accomplish with it. You can use the free digital PDF guide that comes with the product or order a 225-page full-color printed guide from our Gift Collection here.

Family Tree Maker includes:

- Everything you need to begin your journey through your family's history
- A variety of charts and dozens of reports
- Themed backgrounds, borders, and embellishments collection for printing
- Locations database with more than 3 million place names for consistent data entry
- Access to online street and satellite maps
- Digital version of the Companion Guide
- Convenient onscreen Help system

Windows 7 or later, including Windows 10, 300 MB hard disk
space, 2 GB of RAM (4 GB recommended), 1280 x 768 screen
resolution.

What's New in FTM 2019? Plenty!

It's been thirty years since Family Tree Maker was born and it's only fitting that we introduce a new edition this year that takes this grand old brand to places its original creators could only have dreamed of. Where every change you make to your tree on your Mac or PC can be instantly and automatically viewed from any smart phone or tablet. Where you can turn back time to erase mistakes you made even a thousand changes ago. Where you can arrange for your tree to be passed on to a relative of your choice along with your Family Tree Maker license to ensure your legacy lives on. That's just a small part of the new world of Family Tree Maker.

Hints in the Index

Family Given name(s)	Color	Hints	Birth Date
Kennedy, David	Red	☐	1462
Kennedy, David Anthony	Yellow	☐	1955
Kennedy, Edward Moore	Green	☐	1932
Kennedy, Eunice Mary	Blue	☐	1921

Once found only on tree views, in FTM 2019, those little green Ancestry leaves and FamilySearch hints now appear in the people index too. So you can check for hints for a particular family name or for any saved list.

Turn Back Time™

This one might just be worth the whole upgrade. FTM 2019 keeps track of every one of your last THOUSAND changes. Made a mistake three days ago but your last full backup is three weeks old? Simply roll back to just before the mistake was made with a single click. Then use the comprehensive Changes Log to restore the moves you meant to make. Problem solved.

Profile Picture Perfection

Clean up the look of your tree with our new profile picture-cropping tool. Smart technology detects the person's face and zooms in just the right amount, then crops a perfect square so that it fits perfectly on each leaf of your tree. And best of all, the original photo is not touched.

TreeVault™ Cloud Services

With a TreeVault cloud services subscription you can view your tree on your smartphone or tablet. Find out if it rained on your parents wedding day. Designate someone to inherit your research. Have an up-to-the-minute copy of your tree data securely tucked away in case it's ever needed. And much more to come.
